

This checklist is attached to the DX-D 300 Service Manual.

DX-D 300 Serial Number:	
DX-D 300 installation date:	2021-07-26
Date of maintenance:	2024-11-27
Maintenance interval:	12 months or another interval: ...
Service Engineer name:	ANATOLII KOLYADA

### Purpose of this document:

This document provides the reference guide and checklist for the different Preventive Maintenance Visit (PMV) tasks for the complete DX-D 300 System.

#### IMPORTANT:

Strictly observe the safety advices in the referenced documents.

Perform the PMV tasks as described in the referenced documents. This checklist does only contain a short description of the tasks.

Defective or worn out parts or misaligned components, which are found during the PMV are *not* included in the below stipulated labor time. Parts and labor cost for such replacements or alignments (labor & parts) need to be charged outside of a PMV.

### Required time

#### REQUIRED TIME:

- 12-month Maintenance: Approximately 5h
- Additional activities for IEC test after 3 years: Approximately up to 1h additionally. IEC test depending on local requirements. Or shorter period for IEC test if required.
- Additional activities after 5 years: For steel cable replacement 1 person, 2h. Refer to the DX-D 300 - U-Arm - Service Manual with SHF generator, Document ID 41588092.  
or  
Refer to the DX-D 300 - U-Arm - Service Manual with SHFR generator, ID 81611653

### Changes compared to previous revision

Added information about the Sedecal SHFR generator.
